The Alm geranium is a dark foliage, interspecific variety with incredibly bright red flowers. Due to its genetic characteristics, this variety produces twice as many flower stems as comparable varieties. It is also very noticeable that this pelargonium does not stop flowering under different climatic conditions. Weather resistance is exceptional. When cultivated, the variety initially remains compact, but shows excellent growth performance later in summer!

RED EXPLOSION

PELARGONIUM

This renewed super sustainable Pelargonium will make your cultivation profitable!

Without any use of PGRs, Red Explosion is recommended for warmer cultivation on benches.

Because of its natural compact habit, you can place more pots per m²!

This amazing Pelargonium continues to flower and has a strong garden performance during the summer.

That's why we call this convenient grower- & consumer-friendly Pelargonium Red Explosion!

- No PGRs needed at all!
- Suitable for pots from 10,5 cm and bigger
- Self-cleaning
- Attractive leaves
- Garden performance

La Dolce Vita

It's the small things that make life beautiful:
a glass of red wine in the sunset,
a cappuccino in bed or
a terrace full of outstanding pelargonia.
